Innisfallen's Everblooming Hybrid Tea Roses

NOTICE—We offer only OWN ROOT roses. Although we sold budded stock in the past, we received so many complaints that they were not as satisfactory as the own root roses that we offer only own root plants guaranteed to give you satisfaction. OWN ROOT roses give more lasting satisfaction, produce more blooms in years to come, and eliminates the worry of Briars.

Due both to the fact that this has been an excellent season for growing roses, and that a new grower has handled the rose crop for the coming season, we will have larger, heavier two-year old plants to offer. A real buy!

These are delightful for massing in beds, or as edges for borders. They are most profuse and continuous bloomers and their small, neat flowers are produced in large clusters.

BABY DOLL (Tip Top)—Exquisite for cutting and ideal for bedding purposes. The tips of the petals are vivid scarlet, shading into pink, saffron and gold, a very pleasing combination. Flowers are miniature in size, but are produced in the greatest profusion. Small, dainty foliage of dark, lustrous green.

ELLEN POULSEN—Brilliant pink in color—outstanding in its color and fragrance of its flowers.

MLLE. CECILE BRUNNER (Sweetheart)—The most charming of all the exquisite Polyantha Roses, frequently called "Sweetheart" by flower lovers. The full, double flowers are borne profusely; the color is a soft blush pink, deepening to rose.

GRUSS AN AACHEN—Yellowish rose colored with salmon-pink and red shadings; full, strong free blooming and disease proof; erect and of moderate growth. Owing to the size and beauty of its flowers and its symmetrical growth, this variety is highly recommended for low, bright massing.

GOLDEN SALMON—A startling new Polyantha with small, vivid orange flowers in huge clusters. The color is so bizarre that it scarcely resembles a Rose at all.

LAFAYETTE—A variety for massing, or wonderfully effective as a single specimen. A decidedly distinct type as the brilliant cherry-crimson flowers of immense size are produced on great branched trusses (as many as forty flowers on one branch). The largest flowering Polyantha yet produced.

MISS EDITH CAVEL (Bright Crimson)—Showiest of Baby roses. Flowers rich, bright crimson with white eye, exquisitely formed. Bud and flowers are both handsome. Foliage small and of a deep, glossy green.

ORLEANS—Of good size, flowers double, brilliant geranium red with white center, very free and reliable.

HOUSE FERNS

Whitman Fern

THE POPULAR BOSTON SWORD FERN (Nephrolepis Exaltata Bostoniensis)—In the vicinity of Boston no other plant is used so extensively as this graceful Nephrolepsis, which differs from the ordinary Fern in having much longer fronds, which frequently attain a length of four feet. These fronds arch and droop over very gracefully. It is frequently called the Fountain Fern. **Small, 15c each; large, 40c each.**

THE "ROOSEVELT FERN" (Nephrolepsis Roosevelt)—In general characteristics it resembles the Boston Fern, but with two points of great excellence over that variety. First it produces many more fronds, making it a bushier and handsomer plant; then the pinnae are undulated, giving it a pronounced wavy effect seen in no other fern. **Small, 15c each; large, 40c.**

OSTRICH PLUME FERN (Whitmanii)—Gracefully divided pinnae, giving the whole plant an airy lace-like appearance; makes beautiful symmetrical plants even in small sizes. **Small, 15c each; large, 40c.**

COLORADO—A new fancy fern of general form and character of Whitmanii, but upright and sturdy as the Boston. Fronds are wide, tapering in to tip. Leaflets alternating on stems. Main leaflets are smaller replicas of whole frond, projecting at right angles to stem. Center of each frond dark green; the outer two-thirds light green. No stem weakness or delicacy. **Small, 20c each; large, 50c.**

SPARROWII—It has dark green foliage which, with its beautiful crested fronds, makes it a most unique, distinct and desirable Fern. Its robustness makes it easily grown by amateurs. **Small, 15c each; large, 40c each.**

INNISFALLEN—This handsome, new variety originated with us. It is of the Elegantissima type, a strong and rapid grower, handsome green foliage, and has a stiff midrib which makes the fronds stand up better than most varieties of Ferns. It has a distinctness of its own. **Small, 15c each; large, 40c each.**

VERONA—A handsome variety of the Elegantissima type, somewhat resembling the N. Whitmanii, but with finer ostrich plume foliage and with a stiffer midrib which makes the fronds stand up better. **Small, 15c each; large, 40c each.**
